Modern or renovated houses have to fulfill high energy-saving standards.

That is why they are well-insulated and properly airtight.

In succession: there is no airflow between the inside and the outside.

The residents, however, produce a lot of humidity every day, even when they are sleeping.

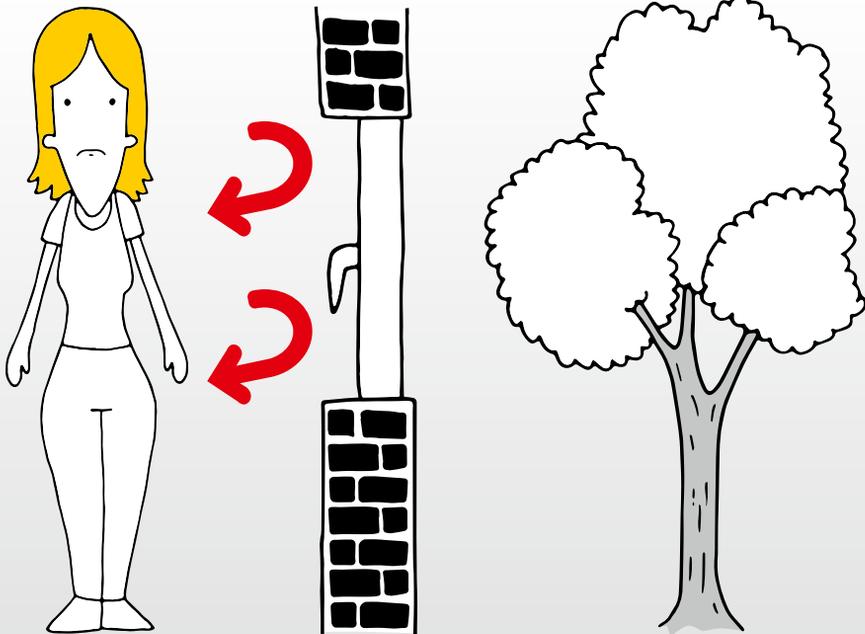

1.700 g/h H<sub>2</sub>O

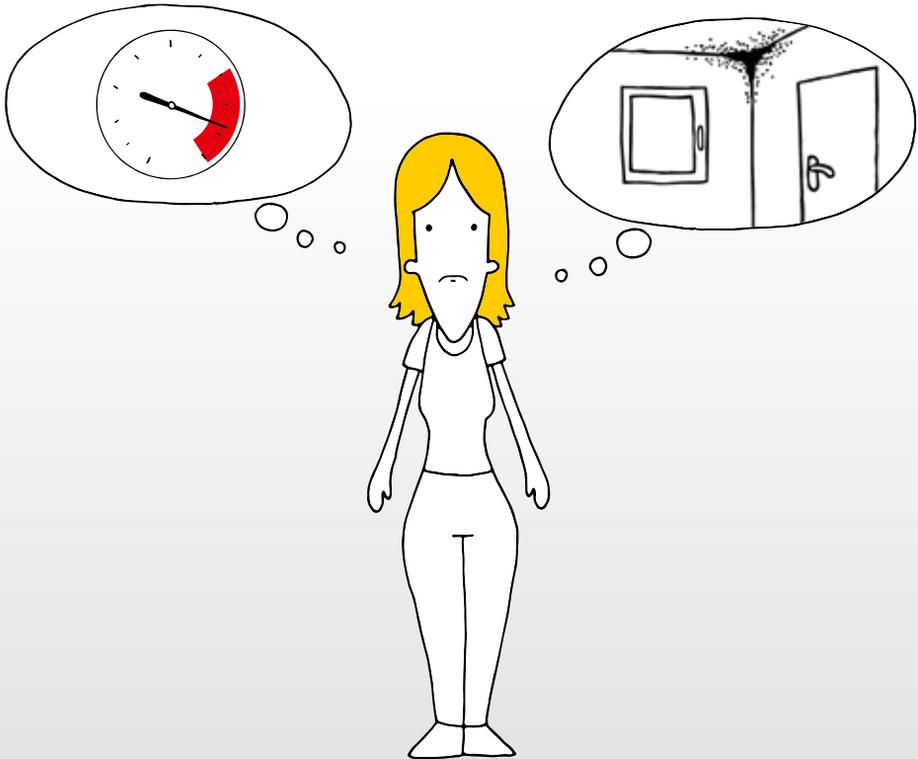

Taking a shower can often increase humidity all over the house.

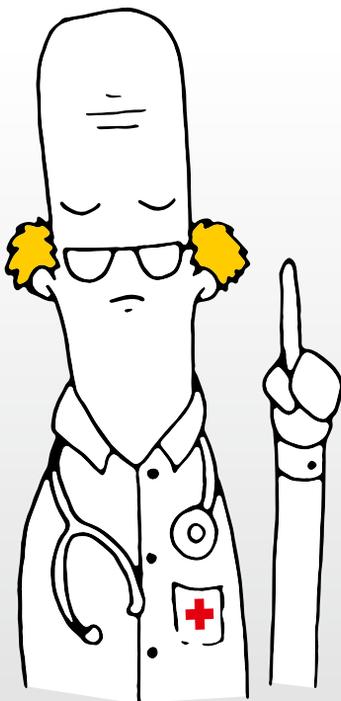

Even everyday housework can affect the  
air quality in a room.

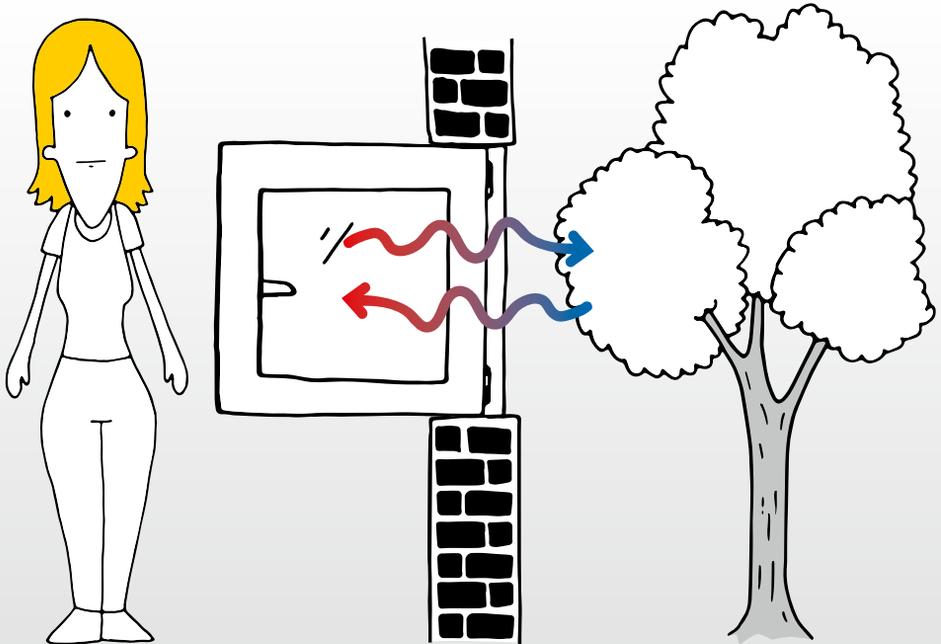

Yet this humidity is unable to escape.

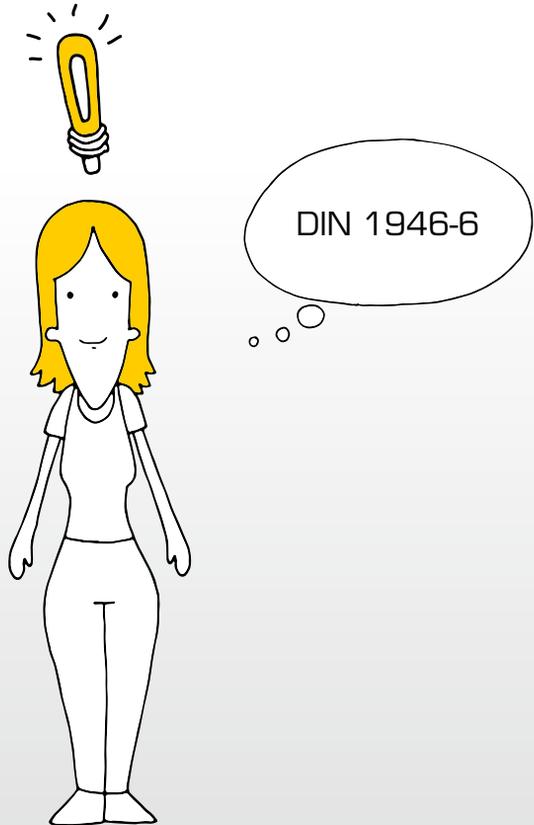

The problem: poor air quality and mould  
can end up with us ...

... powerless and falling ill.

Intermittent ventilation regularly can prevent this.  
But who does?

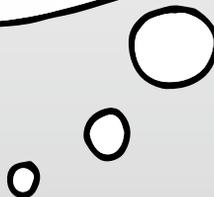

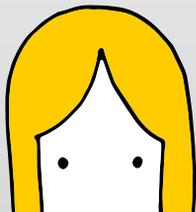

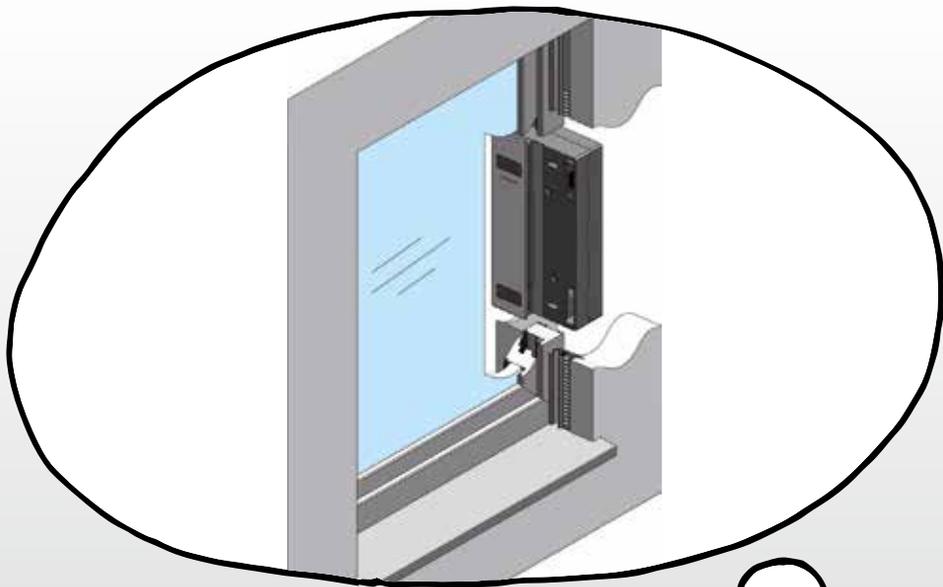

What you need is a ventilation that is **supplied as needed and independent of the user.**

Ventilation standard DIN 1946-6 even makes this a requirement!

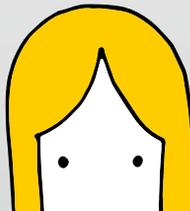

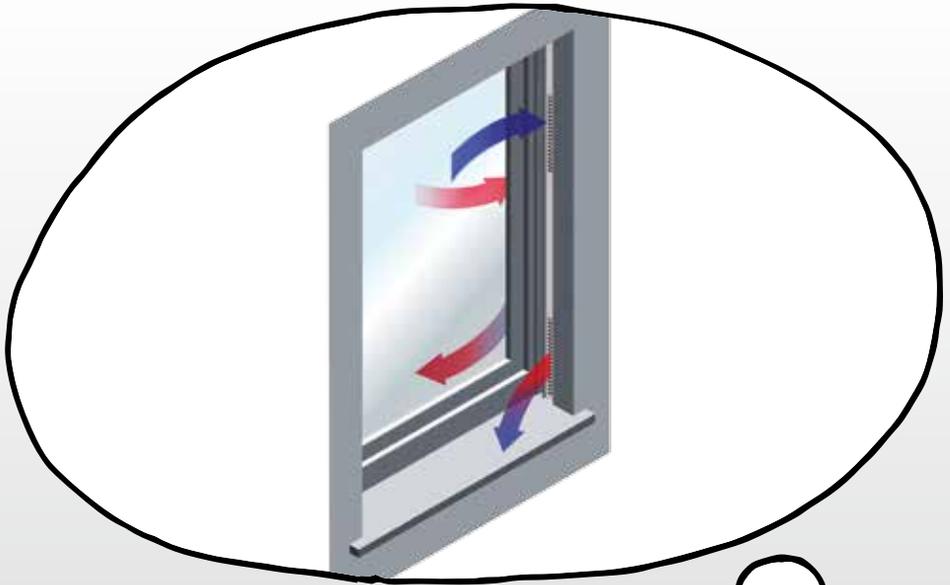

The solution: the **VENTRA®**  
window fan system from **HAUTAU**.

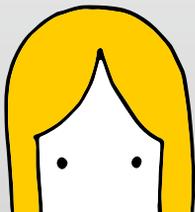

**VENTRA®** is nearly invisible.

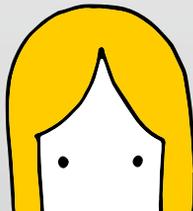

**VENTRA®** let windows breathe.  
The supply air is pre-heated by a  
heat-changer – with low energy consumption.

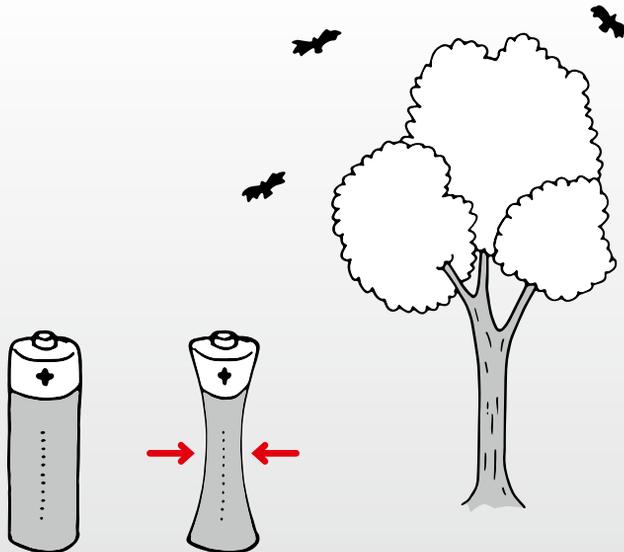

**VENTRA®** works and the architecture remains completely untouched – both on the inside...

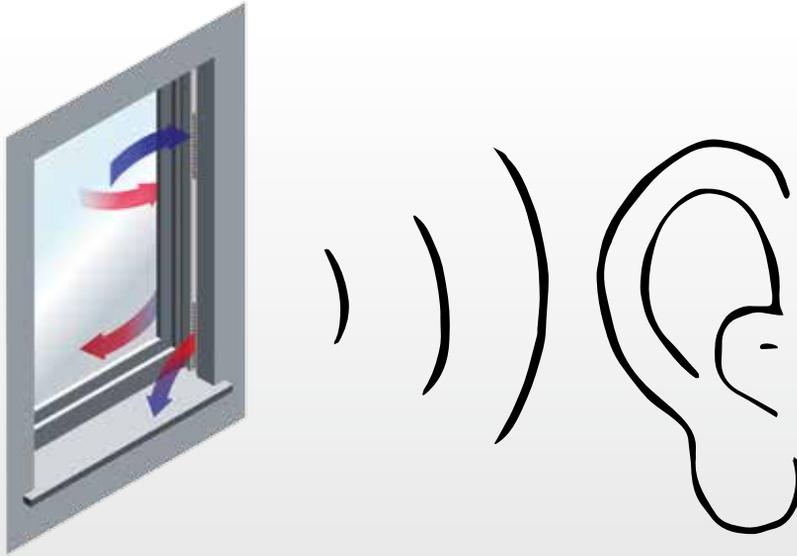

...and the outside!

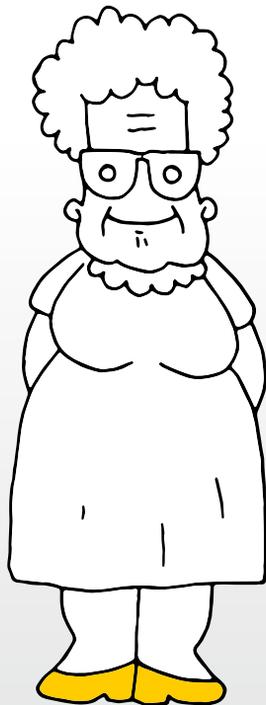

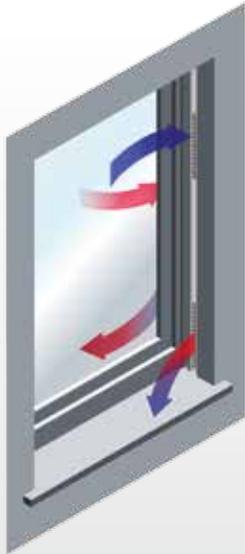

**VENTRA®** uses less energy and saves environment.

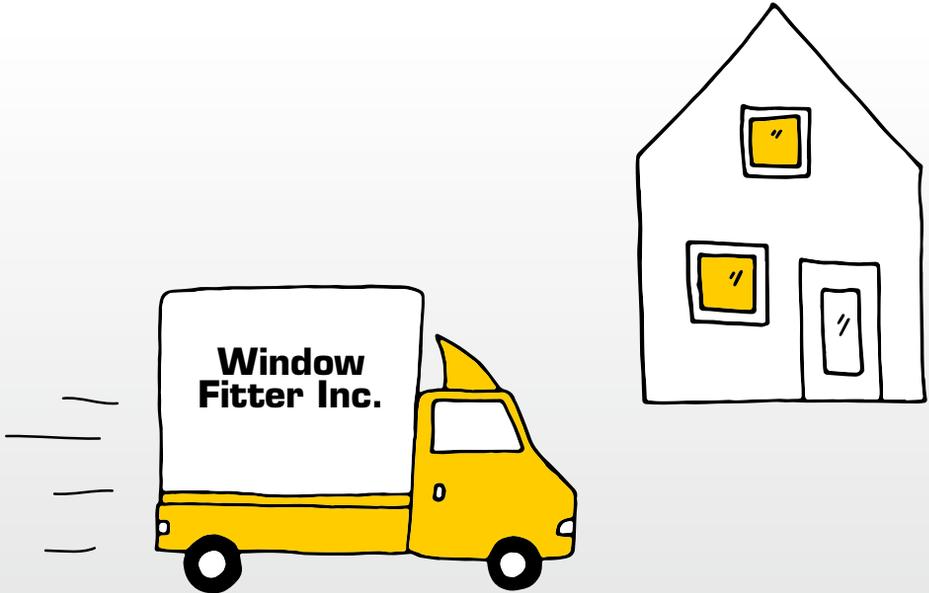

**VENTRA®** is quiet! In fact, you'll not even be aware of it.

**VENTRA®** can be operated  
by anyone.

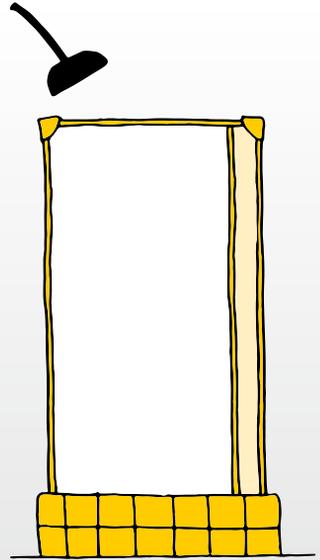

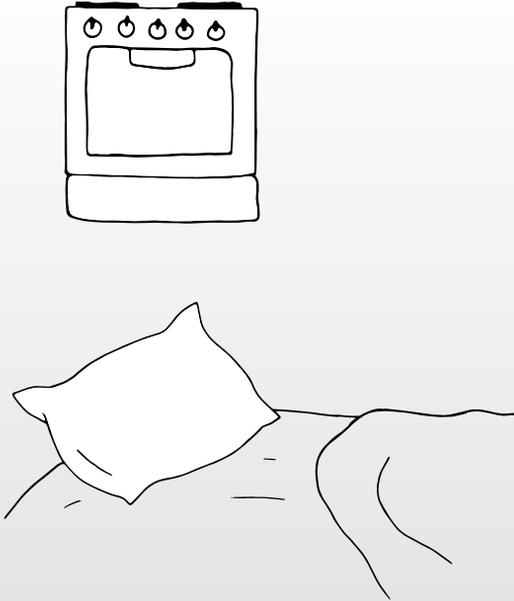

Even allergy sufferers can breathe easy –  
thanks to the optional pollen filter.

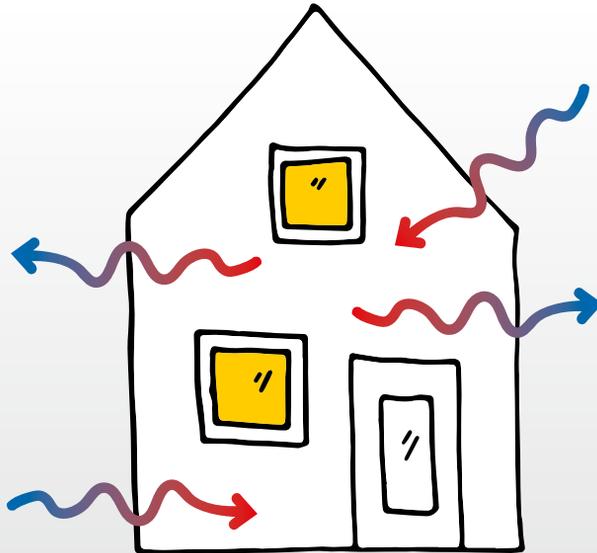

Installing the **VENTRA**<sup>®</sup> window fan is quick and easy and can be performed in a single work step by the window manufacturer during the installation of the new window.

**VENTRA®** will ensure you enjoy good-quality air,  
regardless of your way of life!

Even when you're not at home.

**VENTRA®** lets houses finally breathe again.

Power supply 230 V

Rated power: 30 m<sup>3</sup>/per hour

Measurement:  
(H) 485 mm x (D) 240 mm x (W) 98 mm

## **Product range:**

Window fittings, building control systems for smoke and heat exhaust and ventilation.

### **HAUTAU window fittings**

Slide fittings (ATRIUM)

Fanlight Openers (PRIMAT)

Horizontal and vertical pivot hardware (TORNADO)

### **HAUTAU Building Control systems around the window**

Building control systems for smoke and heat exhaust and ventilation

Window fan ventilation – **VENTRA**®

**VENTRA**<sup>®</sup> – Ventilation by fan  
created by **HAUTAU**.
